

Twain2 FVM Boundary Microphone

No batteries - powered via USB LED power on indicator
Omi-directional Integrated amplified playback
Excellent audio reproduction Industrial quality

Stunning looks combined with rock-solid construction, superb performance and exceptional ease of use. The gentle curves of the FVM microphone's design assists greatly in creating non-threatening environments for sensitive hearings. This empowers participants to be at ease, ensuring productive discussions.

Powered directly via the USB bus it requires no external power supply. The omni-directional microphone allows for an intelligible speech distance of 6 metres (diameter) and can capture speech from up to 15 metres in acoustically friendly environments. The integrated audio playback delivers almost 40% more volume than normal sound cards, assisting typing accuracy when soft-spoken persons have been recorded.

Application

The FVM addresses the need for recording of meetings such as Interviews, arbitration hearings, commission hearings, tribunals and executive meetings consisting of two to ten participants.
